High-End Network DNC System For High Demand

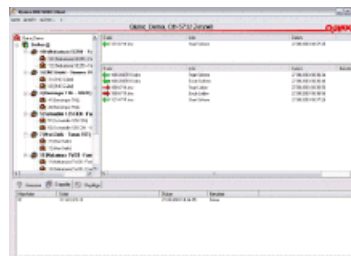

DNC5000 is the first real .NET DNC application on the market. It is programmed with VB.NET and C#. It unites the know how of some hundreds of installations all over the world. It is aiming at customers with high expectations, such as in the medical, automotive or aeronautics and aerospace industry.

Thank to the flexibility of the NC program management, DNC5000 allows paperless production using PC clients/terminals - or today even better tablet PCs - configured to the needs of the user. A detailed log book traces all the transactions of PC users, serially connected machine tools or even network-machines.

DNC5000 is FDA-compliant and fulfills all requirements for FDA validation according the standard for medical equipment DIN EN ISO 13485:2003.

BEST COMBINATION

FDA-compliant DNC

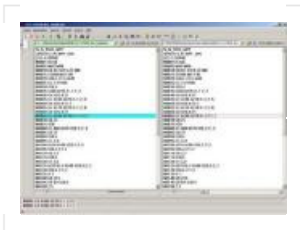

SCD - Smart Communication Device

DNC FOR FDA VALIDATION

- Program request with dummy program, barcode reader or handheld terminal
- Automatic management of versions
- Detailed log of all transactions

- Suvey of all transactions, even controllers with ethernet connection
- Support for all network machines with all their specifics (Siemens, Heidenhain, Fanuc, Mazak, etc.)
- Highly sophisticated client/server concept with automatic actualization of all connected clients on any event
- User-specific access rights
- Data base oriented management of all part programs and related documents
- Fully integrated document management (grafics, text files, AVI sequences, documents of all kinds)
- Interfaces to all related external systems, such as CAM systems, tool management systems, presetters, ERP systems, etc.
- Expandable without limit
- Compatible to all Quinx DNC systems and Quinx network adapters
- **In combination with an IPC close to the machine, DNC5000 can easily be configured to fit the demand for "paperless manufacturing". A terminal gives the machine operator access to all part- or orders-related information.**

ALL INFORMATION ON A MOUSE CLICK

All operations are initiated by a simple mouse click - no manual or special users training is necessary! DNC5000 automates to a large extent the operators part programs' handling and reduces the daily work to about 10% of the usual! DNC5000 is multiuser-capable and can run on several client-PCs at the same time.

Quinx-DNC = All informationen on a glance - all actions on a mouse click!

FREE DEMO VIA INTERNET

A demo lasts about 30 minutes. Please send us an e-mail to make an appointment: <mailto:info@quinx.com>
